Young Surveyors' Contest

2 categories :

- Bachelor and Master
- PhD

Sponsors :

- Leica Geosystems
- TERIA

Prizes :

- 1st : 1500 €
- 2nd : 1000 €
- 3rd : 500 €

Young Surveyors' Contest

Randa Natraš

Researcher at the German Aerospace Center (DLR),
PhD from the Technical University of Munich

Second Prize winner in 2025 for PhD's thesis
"Machine Learning for Modeling and Forecasting the Ionosphere, Including
Space Weather Effects and Uncertainty Quantification"

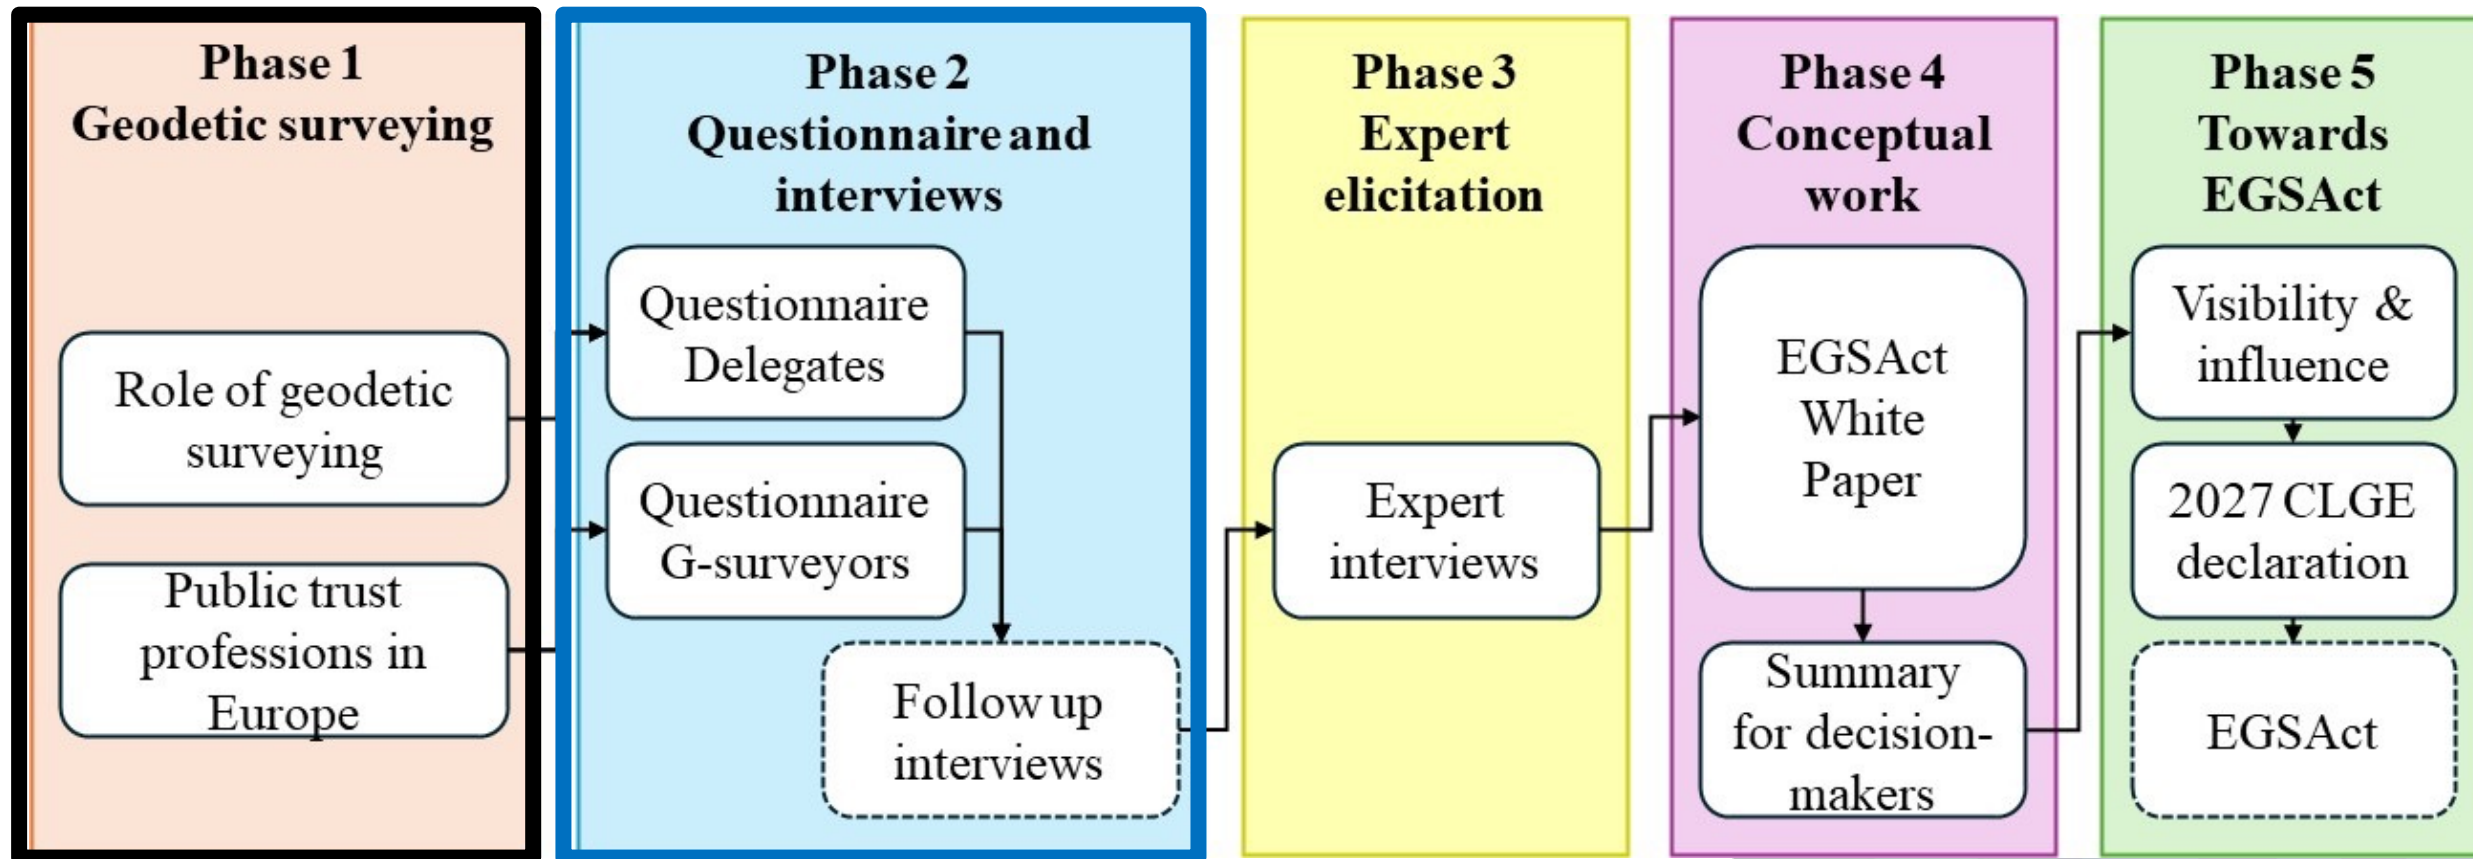

"The CLGE Young Surveyor's Contest was a unique and valuable experience that I highly recommend! Presenting my PhD thesis in the PechaKucha storytelling format was both fun and challenging, as it required me to communicate a complex topic clearly and concisely in an engaging way in less than 7 minutes. Attending INTERGEO and the CLGE Award Ceremony also provided a great opportunity to network with the geodetic community, both in industry and academia."

GISCAD-OV – CLGE joins the efforts to use Galileo in Property Surveying

GSA

In 2018, CLGE joined a consortium led by the Italian companies [GeoWeb](#) and [SOGEI](#), with the aim of submitting a project proposal to the [Horizon 2020](#) programme 'Space-EGNSS'.

The original idea to take part in this bid came from the Italian CLGE member, [CNGeGL](#), via its General Secretary, Enrico Rispoli. The concept was to develop a project based on Galileo to improve the day-to-day business of property and cadastral surveying in Europe.

After a period of intense work, during the last months of 2018 and the first trimester 2019, the proposal was submitted on time in early March. On 14 August 2019, our project called 'Galileo Improved Services for Cadastral Augmentation Development On-field Validation' or GISCAD-OV was approved by the European Authorities.

The project will start in December 2019 or in January 2020 and has a duration of three years.

GeoWeb will be the project coordinator for GISCAD-OV, while SOGEI will lead the scientific and technical efforts. CLGE plays an essential role, primarily in the definition of the user requirements, the pilot projects and the dissemination of the results. Alongside these core actors, a number of other prestigious organisations have joined the consortium: Geo++, Exagone (Teria), the Universities of Delft, Padua and York (CA), to name a few.

Further more detailed information is provided in this [document](#).
